## **AMENDMENT**

Kindly amend the claims to recite as follows:

3. The patch bag according to Claim 1, wherein the ethylene/alpha-olefin copolymer having a density greater than about 0.915 g/cm<sup>3</sup> is present in the blend in an amount of from about 5 to 70 percent, based on the weight of the blend, and the heterogeneous ethylene/alpha-olefin copolymer having a density of less than about 0.915 g/cm<sup>3</sup> is present in the blend in an amount of from about 30 to 95 percent, based on the weight of the blend.

Kindly add the following newly-presented claim:

- ---26. A patch bag comprising a heat-shrinkable patch adhered to a heat-shrinkable bag, the heat-shrinkable patch comprising a first heat-shrinkable film and the heat-shrinkable bag comprising a second heat-shrinkable film, the first heat-shrinkable film comprising a blend of:
  - A) ethylene/alpha-olefin copolymer having a density greater than about 0.915 g/cm<sup>3</sup>, present in an amount of at least about 5 percent based on a total weight of the blend; and
  - B) heterogeneous ethylene/alpha-olefin copolymer having a density of less than about 0.915 g/cm<sup>3</sup> and a composition distribution breadth index less than 55 percent, present in an amount of at least about 21 percent, based on the total weight of the blend; and wherein the ethylene/alpha-olefin copolymer having a density greater than about 0.915 g/cm<sup>3</sup> and heterogeneous ethylene/alpha-olefin copolymer having a density of less than about 0.915
